Credit points 240	Offered in Trimester 1	
Indicative fee \$6,566.00* per year (more) * 2019 indicative annual CSP fee Calculate your fees		

Why choose this program?

Social science applies the 'science' of research and analysis to the world's complex 'social' problems such as sustainability, equity, and diversity, to create positive change.

You'll study some of society's most intriguing issues along with the techniques to analyse them and devise break-through solutions. You'll be equipped to combine your hard knowledge of world issues with advanced data analysis techniques. You'll develop the knowledge to select the appropriate tools and methodologies for the issues you're working on, along with the communication skills to collate and present your findings to decision-makers, to enable evidence-based solutions that can positively transform society.

Climate change is an example of a contemporary challenge that can't be solved by 'pure' science alone. Solutions will come from people who can not only interpret the data but also understand the need for social impact studies, policy development, and effective public communication. Social scientists work in these intersecting spaces, which is why they are in high-demand across government departments, creative industries, political parties, the business sector, in think tanks and non-government organisations (NGOs).

You don't need prior knowledge of statistical research methods as you'll study core courses that will develop your skills in analysing social policy and data, along with your two majors. Each of the majors represents a different perspective on the challenges of the future and allow you to develop areas of expertise that can open doors to a broad range of careers. There are also opportunities to undertake an internship in an area of your interest, and join a global study tour.

Majors

You can choose two of the following majors:

- Economics
- Environmental Sustainability
- Global Security Threats
- Media, Communication and Social Change
- Politics in Asia
- Social Justice

Economics: If you want an expert insight into why the Australian dollar fluctuates or what caused the Global Financial Crisis, this major is the ideal choice. You'll gain an understanding of the big financial issues facing societies and learn how governments make decisions about what to spend on complex issues such as the environment, healthcare, infrastructure and resources. You'll also learn how markets work, and how businesses make decisions about pricing, staffing and responding to competition.

Environmental Sustainability: Environmental sustainability is the world's biggest issue. This major is not about the 'hard science' of the environment, but instead explores the key social and policy issues behind the need for sustainable management

of our planet's finite resources. In this major you'll study environmental politics, climate change policy, the economics of natural resources, and environmental ethics and culture.

Global Security Threats: If you're interested in developing future-focused solutions to some of the world's most complex challenges, this major is for you. You'll be exposed to a stimulating array of international issues, including conflict and forced displacement, terrorism and political violence, Islam-West relations, cybercrime, energy security, and the environment. You'll gain a critical understanding of underlying causes, underpinned by a foundational course in World History.

Media, Communication and Social Change: In the information age, the ways we communicate - and are communicated to - are diverse and ever changing. The ability to understand and manipulate communications is crucial to creating change. Producing, interpreting and analysing communications are not only desirable skills, but fascinating areas of study. This major covers such topics as, the power of mass and social media, journalism, public relations, discourse analysis, new communication technologies, political spin, and the global spread of English.

Politics in Asia: This major harnesses Griffith's internationally recognised strengths in politics and Asian studies. You'll develop a deep understanding of the political, cultural, economic and social dimensions of the Asian region. Topics include the rise of China, global security, the interconnection of business and politics, the role of international organisations, and Australia's place in the region.

Social Justice: This major is for those who are motivated by the fundamental question, 'What makes a fair society?' and are passionate about fighting for a better world. Social justice refers to the idea that all people deserve equal and fair opportunities and treatment. By specialising in this area, you'll explore contemporary hot topics such as human rights, indigenous history and disadvantage, gender and crime, domestic violence, youth justice, power and politics and the administration of the law.

My attendance during the program

Attendance information

The Bachelor of Social Science is offered primarily on-campus with some courses offered in mixed-mode online.

Student Income Support

To be classed as a full-time student, you are required to enrol in a minimum number of credit points each standard study period. The minimum credit points for full-time enrolment in this program is 30 credit points.

Trimester 1 and Trimester 2 are deemed standard study periods. As Trimester 3 is a non-standard study period, continuing students moving from one year to the next will not be required to study during this trimester to be eligible for student income support.

Domestic students who commence in Trimester 3 may be eligible for student income support from the onset of study provided they are enrolled full-time in this study period.

Please refer to the [Australian Government website](#) for more details.

My career opportunities

My career opportunities

Economics: You will be prepared for work in government, NGOs, the finance sector or large business organisations. You'll be equipped to take on roles analysing and interpreting the interaction between markets, the environment, the health sector, transport, financial policy developments and decision-making, and the impact of global conditions on the national economy.

Environmental Sustainability: You will be prepared for work in environmental science communication, environmental management and planning, policy development, environmental sustainability advocacy (in agriculture, industry, and natural resources), social and economic environmental impact analysis, and climate change mitigation and adaptation.

Global Security Threats: You will be prepared for work as an analyst, community advocate, liaison or leader, policy developer (in analysis and evaluation), research officer, corporate strategy officer, or risk adviser.

Media, Communication and Social Change: You will be prepared for work as a communications officer, social policy researcher, speech writer, media liaison, public relations consultant, social media analyst or other roles where you're required to analyse, evaluate and interpret communication strategies or writing across diverse genres and on various platforms.

Politics in Asia: You will be prepared for roles that provide advice to government, business leaders and NGOs in areas such as Asian economic, environment and social policy, regional relationships, regional development, Asian political structures, East-Asian political economy and trade relations.

Social Justice: You will be prepared for work in NGOs, government and business as a consultant, change manager, advocate, development officer, educator, evaluator, market analyst, market or social researcher, or policy analyst.

What are the fees?

Commonwealth supported students

- The fee is indicative of an annual full-time load (80 credit points) in a program categorized to one of the Australian Government's three broad discipline areas (student contribution bands). A student's actual annual fee may vary in accordance with his or her choice of majors and electives. The Australian Government sets **student contribution amounts** on an annual basis.
- [Find out more...](#)

Fee-paying undergraduate (domestic) students

These fees are only applicable to domestic students who are not Commonwealth supported including:

- Full-fee paying domestic students who commenced their program prior to 2009.
- International students who have been approved to pay domestic tuition fees after obtaining Australian or New Zealand citizenship or permanent residency or a permanent humanitarian visa and who have not obtained a Commonwealth supported place.

Tuition fees

- A fee-paying undergraduate student pays tuition fees.
- Students are liable for tuition fees for the courses they are enrolled in as at the census date.
- The tuition fee is charged according to the approved program fee for the trimester in which the student is enrolled.
